SUMMARY

Experienced Full Stack Web Developer with over 2 years of experience in crafting highly responsive Web applications. Known for attention to detail and excellent communication skills.

EXPERIENCE

Web Developer Intern

BLW UNN Zone B.

08/2023 - 04/2024 Enugu, Nigeria.

Believers Love World.

- Managed multiple large-scale projects, delivering all on time and within budget
- Used Reactjs to optimize the team project.
- Collaborated with a team of developers, contributing to a 60% increase in team productivity

EDUCATION

Bachelor's Degree in Electrical Engineering

University of Nigeria, Nsukka.

01/2021 - Present Enugu, Nigeria.

MY OPEN-SOURCE WORK

Kings Record App

A dynamic task manager application. Made with React, Firebase for real-time updates.

https://github.com/VansRouges/Kingsrecord.git

React Admin Dashboard

Highly responsive react admin dashboard built using React + Vite.

https://github.com/David-Maduabuchi/admin-dashboard.git

SKILLS

Web Development	HTML	CSS
SQL	React	Javascript
Typescript	Git	MongoDB
Angular	Express	Postgres
Django	MySQL	Redux
React-Query		

STRENGTHS

Proficiency in JavaScript Frameworks

My expertise in JavaScript frameworks has enabled me to create dynamic, user-friendly web applications. During my previous internship, I led a project to design a member portal for our church using React. This effort led to a 10% increase in the accuracy of membership records, total donations, and member count, as well as a 30% reduction in page load times, greatly enhancing the user experience.

Problem Solving skills

My ability to swiftly and effectively resolve complex problems has been a significant asset in my career. For instance, I identified and eliminated a major performance bottleneck in our web application by optimizing and refactoring inefficient code. This enhancement reduced server response times by 50% and boosted overall application performance.

Adaptability

My adaptability has enabled me to seamlessly transition between projects and technologies, ensuring that I can contribute effectively regardless of the environment. For instance, when my church decided to migrate from raw JavaScript to Reactjs, I quickly learned the necessary skills and played a key role in the optimization of the project.
